Education

University of California, Santa Cruz

Bachelor of Science in Computer Science

Sep. 2019 – June 2023

Santa Cruz, CA

Experience

Tesla

April 2026 – Present

Engineering Technician, Optimus Hand Repair

Palo Alto, CA

- Perform electrical, mechanical, and electromechanical repairs on Optimus humanoid robot hands.
- Troubleshoot motors, sensors, actuators, wiring, and electrical systems using multimeters and diagnostic tools.
- Perform precision disassembly, component replacement, reassembly, and functional verification of robotic assemblies.
- Read schematics, wiring diagrams, and technical documentation to diagnose and resolve hardware failures.
- Document repairs and failure modes while collaborating with engineering on root-cause analysis and recurring issues.

Tesla

September 2025 – April 2026

Equipment Technician, Optimus

Palo Alto, CA

- Bridged data collection and equipment service teams to ensure hardware readiness and reliable collection operations.
- Built hardware for data collection equipment, ensuring components met specifications and operational requirements.
- Assembled and tested custom wire harnesses to verify quality, connectivity, and operational performance.
- Executed diagnostic procedures to troubleshoot PCBs, wire harnesses, electrical components, and equipment failures.
- Generated daily technical reports summarizing defects, observations, and recommended collection improvements.

Develop For Good (Good Samaritan Haitian Alliance Church)

October 2024 – February 2025

Software Engineer Intern | React Native, Firebase, Android Studio, Google Maps API

Remote

- Developed Concordia, a collaborative platform to coordinate services and volunteer teams to support 17,000+ sugar cane workers from 50+ impoverished communities in the Dominican Republic.
- Coordinated with developers and designers to scope, implement, and deploy key features for the application.
- Integrated database with key UI components to dynamically populate and display village data for aid coordination.
- Utilized version control best practices to manage code contributions and ensure seamless team collaboration.
- Conducted thorough testing and debugging to ensure application reliability and smooth deployment.

Revivn

August 2023 – February 2025

Repair Technician

San Leandro, CA

- Evaluated, diagnosed, and tested 100+ devices weekly to determine repair requirements and verify system functionality.
- Diagnosed hardware failures and performed component-level repairs on 50+ returned devices weekly.
- Performed component replacement and functional verification on MacBook systems, including keyboards, LCDs, batteries, and internal hardware.
- Developed a web app to simplify customer return and replacement processes.
- Resolved hardware malfunctions and OS version conflicts on Mac and Windows devices.

Personal Projects

Device Replacement Tool | TypeScript, Next.js, Playwright, MaterialUI

Fall 2024 - Winter 2025

- Created database automation for sourcing device replacements, reducing search time by 75%.
- Web scraped company's database table with Playwright to compute the best possible replacement for customer device.
- Leveraged MaterialUI to closely match company's interface to improve familiarity and readability for employees.

Pantry | JavaScript, HTML/CSS, PostgreSQL, Node, Express, React, MaterialUI, Figma

Fall 2022 - Present

- Led Scrum-based development of a collaborative pantry management web app for shared households.
- Designed UI prototype in Figma and built responsive front-end using React components.
- Designed PostgreSQL database schema for user authentication and inventory tracking.
- Built RESTful API integration to connect React front-end with PostgreSQL backend.

Technical Skills

Languages: Python, JavaScript, HTML/CSS, C/C++, Haskell, Assembly

Frameworks & Libraries: React, React Native, Node.js, Express, Next.js, TailwindCSS, Three.js, BeautifulSoup, Material-UI, Jest, WebGL

Tools & Platforms: Docker, Heroku, Postman, Jira
